Bucharest, Romania • dana.lazar.dev@gmail.com • +40 728 180288

Frontend Developer with 7 years of experience in JavaScript, TypeScript, React and Next.js. Proud contributor to rewriting Regista, one of Romania's key platforms for public administration serving over 70K government users from 1200 public institutions, into a Single Page Application with modern frontend tech stack and architecture.

Professional Experience

Frontend Developer	Project 365 Communication	July 2025 – present
--------------------	---------------------------	---------------------

Bucharest, Romania

Collaborate with a digital PR company to develop content-driven web solutions for cultural and public-facing clients.

- Migrated a large cultural WordPress website to a headless setup using Next.js, WPGraphQL plugin and a custom frontend, improving load times and editor flexibility.
- Developed custom WordPress theme using PHP, HTML, CSS, and JavaScript for flexible content management and faster adaptation to unique requirements for a political party.
- Ensured compliance with WCAG 2.1 accessibility standards by implementing semantic HTML, ARIA roles, and accessible navigation for client website.
- Improved performance for a content-heavy cultural website by using static generation, Next.js image optimization (responsive formats and lazy loading), and server-side caching for GraphQL queries.

Technologies: *Next.js, HTML, Tailwind, WordPress, Vite, GraphQL, Headless CMS, SEO, Performance Optimization, Responsive Web Design.*

Frontend Developer	Zitec	June 2022 – June 2025
--------------------	-------	-----------------------

Bucharest, Romania

Delivered frontend applications for large-scale e-commerce, marketing, and public administration systems.

- Refactored, using the BDD methodology, a legacy public administration platform into a modern React Admin/TypeScript SPA, improving maintainability and reducing feature delivery time.
- Improved UX stability during a multiphase migration by integrating legacy interactions with new components, maintaining user satisfaction while adding new features.
- Strengthened testing reliability by implementing React Testing Library best practices, improving test coverage from 0 to 85%, and ensuring high confidence in code during fast development iterations.
- Built secure multistep validation workflows in Next.js for the credit application system of eMAG, Romania's largest ecommerce platform, increasing valid financing applications.
- Debugged form flows and edge-case rendering issues, decreasing QA-reported front-end defects by ~20% across multiple sprints.
- Created a dynamic React-based marketing form builder powered by REST API schemas, reducing manual setup time for new campaign configurations.
- Strengthened marketing app accessibility and Core Web Vitals by implementing semantic HTML, ARIA roles, Lighthouse audits, and accessibility testing, ensuring best practice compliance and visual stability.
- Used GPT-4 and other LLM based tools for mock data generation and documentation, accelerating prototyping without sacrificing code quality.
- Worked in Scrum teams of 5–10 developers, maintaining close collaboration with stakeholders, business analysts, and designers via daily standups, backlog refinement, estimations and sprint retrospectives.

Technologies: *HTML, CSS, JavaScript, React, TypeScript, Next.js, React Admin, Tailwind CSS, Shadcn/UI, REST APIs, GitLab CI/CD, React Testing Library, Agile, Jira, BDD, Accessibility (WCAG), Web Performance, Lighthouse*

Frontend Developer

Web Services Solutions

June 2018 – June 2022

Bucharest, Romania

Delivered custom, content-driven websites for clients across media, public institutions, and political organizations.

- Implemented designer-driven UI layouts using HTML, CSS, Bootstrap, and JavaScript, with attention to accurate rendering across devices and browsers.
- Optimized site performance through asset minification, image optimization, and caching strategies, improving Lighthouse scores for speed and SEO.
- Developed custom WordPress themes using PHP, HTML, CSS, and JavaScript for flexible content management and faster adaptation to unique client requirements.
- Collaborated within a Waterfall team of 3 frontend developers, 4 backend developers, and 2 designers to deliver predictable, in time releases.

Technologies: *JavaScript, PHP, HTML, CSS, Bootstrap, WordPress, Webpack, Theme Development, Custom Fields, SEO, Performance Optimization, Responsive Web Design.*

Editorial Project Management

Web Services Solutions

February 2016 – June 2018

Bucharest, Romania

Managed and published multiple websites, establishing strategic direction, editorial plans, and promotional campaigns while supervising design and development workflows.

- Built and led editorial teams, coordinated content creation with external collaborators, and implemented SEO and social media programs to increase site traffic and engagement.
- Designed and supervised special projects and client promotions, integrating user feedback, expert input, and interactive campaigns to enhance audience reach and engagement.

Education

- **Software Mastery™ by theSeniorDev** - a 1-year mentorship program on a wide array of high-level topics, such as System Design, Microservices Architectures, API Design methodologies, and advanced CI/CD processes.
- B.Econ. **Academy of Economic Studies**, Bucharest.

Skills and Technologies

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Technologies:** React, React Admin, Next.js, Zustand, Redux, GraphQL, RESTful APIs, Testing, Tailwind, Bootstrap, Material UI, Shadcn/UI, Git, GitLab, SQL (PostgreSQL), Webpack, Vite, Docker, Figma
- **Methodologies:** SCRUM, Agile, BDD
- **Interests:** Web Performance, UX
